

# Gradual-N<sup>®</sup> 10-0-10-0.5B

## Guaranteed Analysis

**10-0-0**

Total Nitrogen (N)*	10.0%
7.5% Urea Nitrogen	
2.5% Other water soluble nitrogen	
Soluble Potash (K <sub>2</sub> O)	10.0%
Boron (B)	0.5%

Derived from: urea, polymethylene urea, potassium chloride, and boric acid.  
\*2.5% slowly available Nitrogen from methylene urea

Chlorine (Cl) maximum	8.0%
-----------------------	------

## Caution

### **KEEP OUT OF REACH OF CHILDREN**

In case of contact with eyes and/or skin, immediately flush with plenty of water and seek medical attention.

#### STORAGE and DISPOSAL

Do not store below 32°F. Store out of direct sunlight. Keep in a cool location out of reach of children and livestock. Dispose of empty containers by triple rinsing and discard empty containers in a landfill in accordance with current local, state, and federal regulations.

#### PRECAUTIONS

**Gradual-N<sup>®</sup> 10-0-10-0.5B** is most effective when plants are growing rapidly and least effective when plants are dormant or suffering from stress. Do not apply when temperatures exceed 90°F or when plants are under stress due to excessive heat or lack of moisture. Determine compatibility before tank mixing with other fertilizers and/or pesticides by a jar test.

**WARNING:** Excess amounts of Boron can cause plant injury. **DO NOT OVER APPLY!** Always obtain specific Boron recommendations from your local agricultural authority before applying.

F632

Manufactured By:  
RSA MicroTech, LLC  
P.O. Box 64589  
St Paul, MN 55164-0589

Weight per gallon 10.0 lbs (4.51 kg)  
Net Contents: 2.5 gallons (9.46 L)  
Net Weight: 25 lbs 0 oz. (11.2 kg)  
0/E11/4

## GENERAL RECOMMENDATIONS

**Gradual-N® 10-0-10-0.5B** is designed for foliar application where the addition of boron, potassium, readily available nitrogen, and slowly available nitrogen could be beneficial. **Gradual-N® 10-0-10-0.5B** contains urea nitrogen for immediate response as well as methylene urea, which is converted to a usable form of nitrogen over time. The boron in **Gradual-N® 10-0-10-0.5B** rapidly absorbed and translocated throughout the plant. This product is a supplement to normal fertility program.

**Gradual-N® 10-0-10-0.5B** can be mixed with most pesticides when mixing is done in the following order: (1) ½ of the water (turn on circulation), (2) **Gradual-N® 10-0-10-0.5B**, (3) flowable materials, and (4) wettable powders. If local information is not available on compatibilities, conduct a jar test.

**FIELD CROPS** (corn, soybeans, edible beans, sorghum, sugar cane): Apply ½ to 2 gallons per acre by ground. Apply 4 to 6 weeks after planting (prior to bloom) or when deficiency symptoms first appear. For aerial applications, use 1 to 4 quarts per acre in a minimum of 5 gallons of water.

**COTTON:** Early to mid season apply 1 to 3 quarts per acre, mid season to boll set apply 2 to 4 gallon per acre.

**VEGETABLE CROPS:** Apply ½-2 gallons per acre. Application should be made early in the growing season. This treatment should be repeated if crops continue to show deficiencies. Avoid spraying during bloom periods.

**ORCHARD CROPS** (apples, pears, pecans, citrus): Apply ½ to 2 gallons per acre pre-bloom. Applications after petal fall should be done only with local information as to not physically spot the fruit.

**GRAINS** (wheat, rice, oats, barley): Apply 2 to 8 quarts per acre in adequate water to assure thorough coverage. Make the first application at tillering and the second application 14 to 21 days later. For best results, spray when the crop is actively growing, after irrigation or natural rainfall.

**ORNAMENTALS:** Apply according to the boron needs of the plants. If additional nitrogen is needed, use Gradual-N in the spray mixture.
